## PROFESSIONAL SUMMARY

B.E. Computer Engineering student with hands-on cybersecurity practice in web security, networking, Linux and security testing. Seeking an entry-level cybersecurity role to apply technical skills in securing systems and analyzing security threats. Familiar with Burp Suite, Nmap, Wireshark, Metasploit, Nikto, OWASP ZAP and Snort, with a strong interest in Ethical hacking and cloud security.

## TECHNICAL SKILLS

**Cybersecurity:** Web Security, Vulnerability Assessment, Penetration Testing Fundamentals
**Security Tools:** Burp Suite, Nmap, Wireshark, Ettercap, Nikto, OWASP ZAP, Metasploit, cURL, OpenSSL, Stunnel, Snort
**Networking:** TCP/IP, HTTP/HTTPS, DNS, NAT, Network Scanning, Traffic Analysis
**Operating Systems:** Kali linux / Windows
**Programming:** Python, JavaScript, C++, HTML, CSS

## CYBERSECURITY INTERNSHIP EXPERIENCE

**Cybersecurity Essentials Intern — Cisco Networking Academy** |
Duration - 15 Days
• Completed a 15-day internship focused on Cybersecurity Essentials through Cisco Networking Academy.
• Learned fundamental concepts of cybersecurity, network security, threats, vulnerabilities and security practices.
• Gained practical understanding of basic cybersecurity tools, networking concepts and security awareness.

## CYBERSECURITY HANDS-ON EXPERIENCE

• Used Kali Linux for reconnaissance, networking, web-security testing and security-tool practice.
• Practiced web security testing with Burp Suite and worked with common vulnerability concepts in controlled labs.
• Performed networking and traffic-analysis practice using Nmap, Wireshark and related security tools.
• Completed 30 hands-on labs on PortSwigger Web Security Academy, practicing web application security concepts.
• Completed practical exercises on TryHackMe and Hack The Box.

## PROJECTS

**Hostel Management System**
• Developed a project for managing hostel-related information and day-to-day hostel operations.
**Tracking Map**
• Developed a map-based tracking project focused on displaying and tracking locations.
**Port Scanner**
• Web-based cybersecurity project that scans a target system to identify open ports and potential threats.

## SECURITY TOOLS KNOWLEDGE

Burp Suite, Nmap, Wireshark, Ettercap, Nikto, OWASP ZAP, Metasploit, cURL, OpenSSL, Stunnel, Snort

## EDUCATION

**Government Engineering College, Palanpur —** Pursuing Bachelor of Engineering in Computer Engineering
Gujarat Technological University (GTU) | CGPA: 6.74

## CERTIFICATIONS

• Cybersecurity Essentials
• SCSE – Star Cyber Secure Essentials
• Junior Cybersecurity Analyst

## PRACTICE PLATFORMS

PortSwigger Web Security Academy: 35 labs | TryHackMe | Hack The Box
